Hemmings

Have you ever attended one of our Hemmings programs? Last summer we welcomed dozens. This fall we'll do the same. Our growing number of Hemmings programs, featuring vehicles from every year back to 1900, from every corner of the country and every continent of the world, will again draw an international crowd of car enthusiasts. Events include private tours of private collections, tours of specific regions, guest speaker programs, and more. Join us this fall and see what all the fuss is about.

Thoughts from the Reporter's Corner

Being in San Carlos, Az. allowed me to experience several things. One thing I found interesting was the large number of RVs parked around the area. It seems like everyone has an RV or a camper. The locals told me that this is because of the climate. Arizona has a desert climate which is hot and dry, and many people choose to live there year-round. The large number of RVs also speaks to the popularity of RVing and camping in this area.

Education

The CCA's Education Committee will be offering a 2019 Fall Lecture series to bring in new members. The series will begin in November and continue through December. Each lecture will be given by a local expert in the field of classic car restoration and preservation. Topics will include the history of vehicles from various eras, as well as tips and techniques for maintaining and repairing classic cars. The lectures will be held at the CCA's main location and are open to the public.

Recreation Land

The Clark County committee is making progress, and has been supported by the Nevada Department of Conservation and Recreation. The committee has been working closely with the Bureau of Land Management, as well as local landowners, to ensure that the needs of the community are met. The process is expected to be completed within the next few months.

Cascabel Conservation

Cascabel Conservation is the perfect place to spend a day. The area is known for its beautiful desert scenery and history. There are several visitor centers that offer information about the area and its history. The Cascabel Conservation area also offers opportunities for hiking, bird watching, and photography. Whether you're interested in nature or history, there's something for everyone at Cascabel Conservation.
